

Please do not interfere with the rights of a free society!

I am going to take a very educated guess and assume you published this request for public comment re: economic security, because you are worried about the patents Blacklight Power is applying for. Yes, their energy production and 'anti' gravity technologies will disrupt society and the economy, but they will do so in an extremely POSITIVE way. Please do not dare barring these particular patents from moving forward.

Thank You,

Eric Hermanson
